

- (A) CHAIR
- (G) Cabinet
- (B) SINK
- (H) Cabinet (Supplies)
- (C) SHAMPOO BOWL
- (J) HOT WATER HEATER
- (E) WORK STATION
- (L) Restroom
- (F) COVERED CONTAINER (SOILED TOWELS)
- (M) ENTRANCE

Salon Floor Plan (please read instructions carefully)

Prepare a diagram of the salon floor plan following the example on page 6:

- Each room used for regulated services must have a sink (or shampoo bowl), or have an unobstructed opening 5 feet or wider to an adjoining room which contains a sink (or shampoo bowl). Opening width will then need to be labeled.
- The dispensary must have a sink. It can be a separate room with a sink or a locked cabinet near a workspace sink.
- Each room must be labeled as what it is used for.
- All codes from page 6 are required to be used (excluding possibly the pedicure spa and/or shampoo bowl). If the hot water heater or restrooms are not located within the salon itself, please use the margins to explain their location.
- You may instead submit blue prints/formal drawings with appropriate codes and labels (must still complete below deductions).

Each square below represents 5 feet by 5 feet. If your salon is larger than 50 feet by 50 feet, attach additional pages to show complete floor plan.

<p>Total Floor Space (from salon floor plan above) = <u>246</u> square feet</p> <p>Total Deductions (from calculation at Right) = <u>90</u> square feet</p> <p>Total Work Space (Total Floor Space minus Total Deductions) = <u>156</u> square feet</p>	<p>Calculate any Reception, Restroom and Supply areas which are part of the salon floor space:</p> <p>Reception Area = <u> </u> square feet</p> <p>Restroom Area = <u>50</u> square feet</p> <p>Supply Area = <u>40</u> square feet</p> <p>Total Deductions = <u>90</u> square feet</p>
